

Overview

Delay is engineered for environments that demand increased security against physical breaches, strengthening existing glass to provide critical delay and valuable time for emergency response.

Benefits

Designed to withstand sudden physical impacts, **Delay** increases the difficulty of breaching glass surfaces during forced entry attempts. This foundational level of defense helps safeguard people and property by deterring opportunistic threats, all while maintaining clear visibility with minimal visual impact.

Product Data Sheet

Independent Lab Testing:

- ANSI Z97.1 – Safety Glazing Standard
- ASTM F1642 / ASTM F2912 – Blast Mitigation Performance
- EN 356 – Resistance Against Manual Attack
- ASTM F3561 – Level 2 – Forced Entry Resistance Following Simulated Active Shooter Conditions

Product Specifications:

- Thickness: 30 MIL
- Total Solar Rejection: 22%
- IR Rejection: Up to 57%
- UV Rejection: Exceeds 99%
- Protection Level: Essential Intrusion Resistance
- Additional mechanical properties testing, including Tensile Strength available upon request
